

PMG Signature Preamp Firmware Upgrade Guide

What You Need to Start

1. To update the Preamp firmware
 - USB thumb drive
 - The PMG Signature Preamp vX.Y.Z.zip file from the PS Audio website
 - Ensure your PMG Signature Preamp is plugged in during the upgrade
-

Update the Preamp Firmware

Prepare the USB drive

1. On your PC or Mac, **unzip** the downloaded file (see **How to Unzip Files** below).
2. Copy all the files from the unzipped folder to your USB drive.

Update the Firmware

- Plug the USB stick into the FW slot on the back of the PMG Signature Preamp.
 - Using the switch in the back of the unit, power the unit off, then power it back on.
 - The Logo will blink 25-30 times, then stop.
 - The unit will boot automatically.
 - The update is complete. It is safe to remove the USB drive.
 - You can go into the Menus | Versions to verify you are on the correct firmware.
-

Troubleshooting

- It is okay to leave the thumb drive in the unit. The unit will detect the firmware is the same and skip the update. However, PS Audio recommends that the USB thumb drive be removed during normal operation of the device.
- Make sure the USB drive is formatted for FAT32. not EXFAT.
